“

*Just back from a few days on the  
Yorke Peninsular SA. The Goldie  
was fantastic and a dream to tow.*

**ROB & JACKIE**

”

At Goldstream RV we are committed to our customers, our brand, our people and our product. We have continued to use only the highest quality materials that are available and in the smartest finish and design that is available in today's marketplace.

However it just isn't all about a stunning interior look. A majority of our Caravans are built for the adventurous traveler so it all starts from the ground up. We have been extremely mindful that you still want to be able to get into those out of the way places so we have worked diligently to ensure our build quality hasn't suffered due to a change in look and still offer that peace of mind Goldstream RV quality across our Caravan range.

Welcome to the all New Goldstream RV Caravan Australis Range, your world of Adventure awaits.

# Goldstream RV QUALITY

State of the art machinery and quality materials equals best finish. We offer our customers the latest in manufacturing technology, including our in-house CNC and edge banding machines which give our custom build furniture a flush modern look and superior finish.

Goldstream RV takes pride in our products which is quite evident in our finish, all furniture is checked out and jointed and then screwed and glued by our highly skilled team using 15mm European Poplar ply which is lightweight, moisture resistant and highly durable.

All our products are rigorously tested from the ground up, we choose products that work when they need too so peace of mind is assured.

# *Get out there and* **EXPLORE AUSTRALIA**

With every Goldstream RV Caravan there comes a sense of pride of ownership. Just ask any Goldstream RV owner out there and they will all say the same.

The level of quality appointments, the ability to get off the beaten track and a great all round package puts Goldstream RV way ahead of the pack. Our broad range of layouts will suit most tow vehicles on the market, all our vans have been designed around keeping tare and ball weights within these limits so refer to our specifications list to see what will suit your vehicle.
