HAND CRAFTED INTERIORS

Avan incorporates its own specialised construction of the interior furniture in all its vans. Edge-banded timber construction produces a sophisticated and appealing living environment while providing the durability for holidaying use. Fine craftsmanship and technology ensures a superior finish is standard. While a versatile day/night configuration allows you to enjoy greater comfort in your own home on wheels.

STRENGTHENED AERODYNAMIC EXTERIOR PANELS

Avan has 20 years of manufacturing experience in bonded panel construction. Our unique insulated sandwich panel side walls, with ply re-enforced aluminium outer skin, are built to withstand the rigours of travel and camping life. Our trademark sleek lines and smooth finish have been at the forefront of industry innovation and forced the competition to follow. The construction process

incorporates styrene foam insulation, 2 x layers of ply and smooth pre-painted aluminium outer panels for ultimate styling. The smooth pre-painted aluminium outer panels offer unique advantages over fibreglass including: superior strength, lower weight per square metre, surface style, UV-resistance, aging resistance and low dirt-retention.

SUPERIOR CENTURION CHASSIS

Unique to Avan, the Centurion Chassis offers superior support for your Camper. Hot dipped galvanized steel ensures that your Avan will remain protected from corrosive elements that can fatigue other types of chassis. Intelligent engineering design maximizes strength and resistance to torsion and compression via pressed hole cross-members. The unique design also allows better protection to electrical wiring running underneath your van. For your long-term peace of mind, choose the Avan Centurion Chassis.
